10 GEM MINT

Photo-based condition estimate | Moderate review confidence

CENTERING

Front borders appear close to even, with strong back alignment. Angled photographs prevent a calibrated centering measurement.

CORNERS

The supplied front corner details appear sharp, with no obvious bends or substantial whitening. Fine reverse-corner detail is limited.

EDGES

No obvious chipping, peeling, or layer separation is visible in the supplied views.

SURFACE

No definite scratch, crease, or dent is established by the photographs. The additional angled image shows no obvious damage. The owner reports a flawless surface after in-hand inspection; earlier apparent haze remains unconfirmed as damage.

REVIEW BASIS

Ten submitted photos were reviewed. The final estimate incorporates the owner's in-hand report of a flawless surface. No calibrated centering ratio or independently measured subgrades were assigned.
