10 GEM MINT

Photo-based condition estimate | Moderate review confidence

CENTERING

The front and reverse look reasonably balanced, with no obvious major alignment shift. Angled photographs prevent a calibrated centering ratio.

CORNERS

The additional bottom-right corner close-up shows a sharp, square corner and resolves the earlier impression of softness. Other visible front corners appear sharp; fine reverse-corner detail is limited.

EDGES

Edges appear generally clean, with slight apparent cut texture along the top in the initial photos and no substantial chipping established. The owner reports that the edge is fine on in-hand inspection.

SURFACE

No obvious crease or dent is visible. A small curled, thread-like mark appears near the right border in the initial front views; it is not established as a scratch. The owner confirms the surface is clean after in-hand inspection. Fine defects cannot be excluded from photos alone.

REVIEW BASIS

Nine submitted photos were reviewed, including the clearer bottom-right corner close-up. The finalized 10 Gem Mint photo estimate incorporates the owner's in-hand confirmation that the edge and surface are clean. No measured subgrades were assigned. This is an estimated condition opinion, not an independently verified in-hand grade.
