CENTERING

Front appears balanced for its asymmetric design. Back appears reasonably aligned. Camera perspective prevents calibrated ratios.

CORNERS

Front close-ups show sharp corners with no obvious bends or rounding. The back is shown in an overall view.

EDGES

No confirmed chipping or separation is visible in the supplied views.

SURFACE

The refractor surface appears clean across the submitted lighting angles. No confirmed scratch, crease, dent, or print line is visible.

ASSESSMENT LIMITS

This finalizes a 10 Gem Mint image-based condition opinion with moderate confidence. Unresolved marks are not confirmed defects. Photographs cannot establish authenticity or reveal every hidden scratch, dimple, or alteration. No in-hand inspection was performed, and another grader may reach a different result.
