Certification: SAI-2026-MM-1002-001

Assessment finalized October 2, 2026 | 8 submitted images

CENTERING

Front appears balanced, accounting for the wider printed design on the left. Back appears reasonably aligned. Camera perspective prevents a calibrated centering ratio.

CORNERS

Front close-ups show sharp tips without obvious bends or rounding. Back corners are documented in an overall photograph rather than individual close-ups.

EDGES

No confirmed edge chipping or separation is visible in the submitted views.

SURFACE

No obvious scratch, crease, dent, or print line is visible across the submitted lighting angles. Reflective finish and glare limit detection of fine surface flaws.

ASSESSMENT LIMITS

This finalizes a 10 Gem Mint image-based condition opinion with moderate confidence. Unresolved marks are not confirmed defects. Photographs cannot establish authenticity or reveal every hidden scratch, dimple, or alteration. No in-hand inspection was performed, and another grader may reach a different result.
